Offshore application

The best way to keep your installation profitable

REINFORCEKIT® 4D

The original 3X concept is a combination of Kevlar® tape and specific epoxy resin, which provides the required strength according to the actual standards such as ASME B31G, ISO24.817, ASME PCC-2.

This composite technology reinforces your pipes which had lost up to 80% of their original wall thickness.

-  Visual guide
-  Kevlar® tape
-  Suitable for welds
-  Kit packaging
-  Light product
-  None conductive
-  Suitable for Tee
-  Suitable for elbow

Indeed, thanks to our Reinforcekit Engineering Analysis (R.E.A) software, 3X is able to design any kind of pipe composite reinforcement including repair quality and durability as per associated standards.

INSTALLATION STEPS:

USED BY:

IN-SITU In-Situ Solution (M) Sdn Bhd (524237-W)
